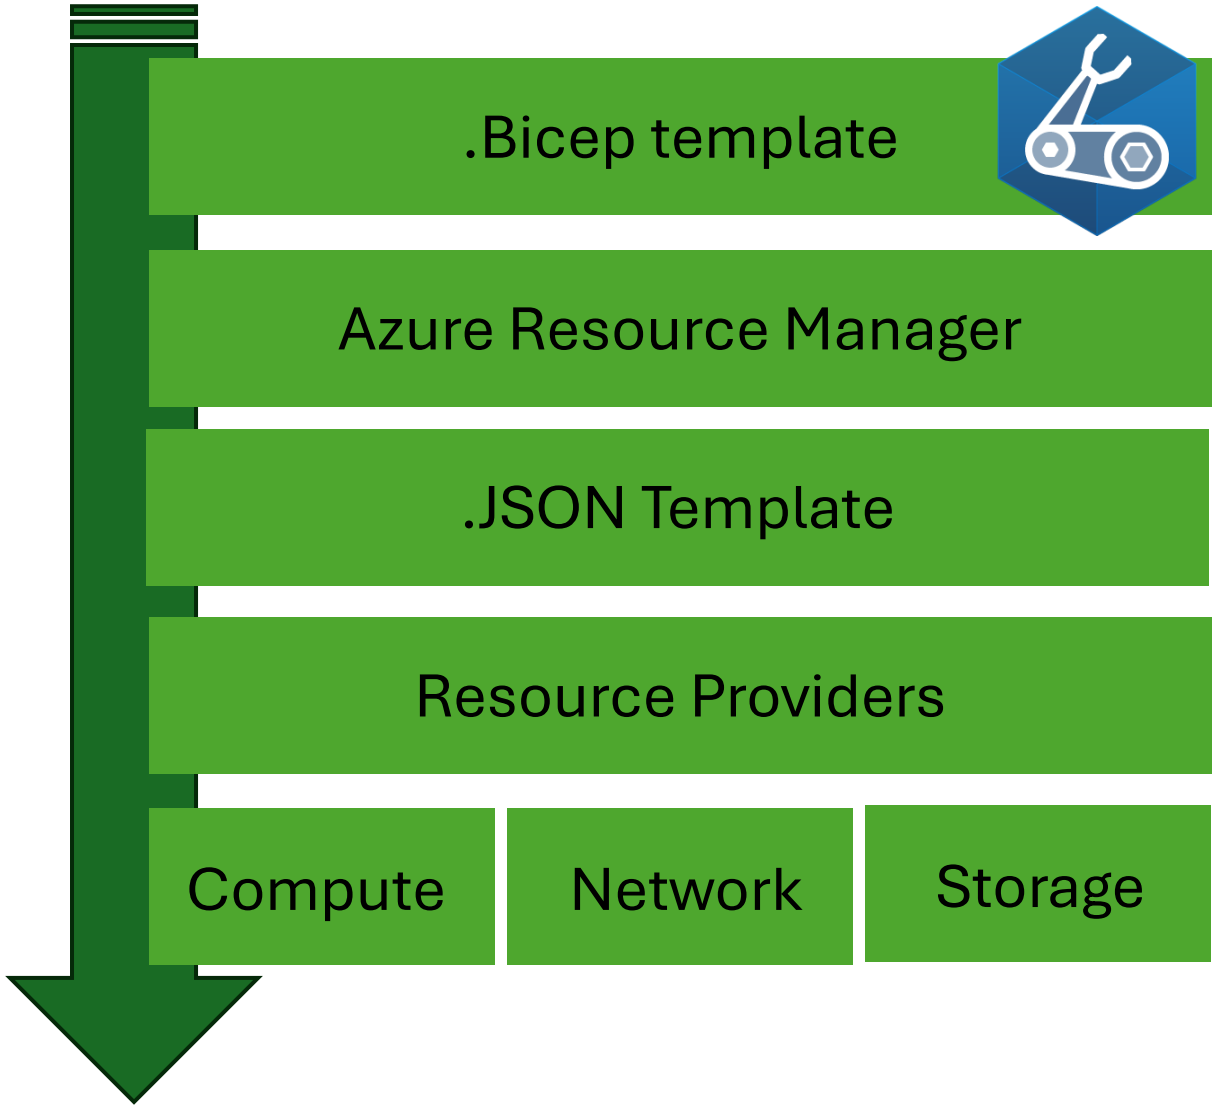
Fun fact about me:
Board games
(collection of 200+ games)

What is Bicep

- Declarative
- Idempotent
- Fast



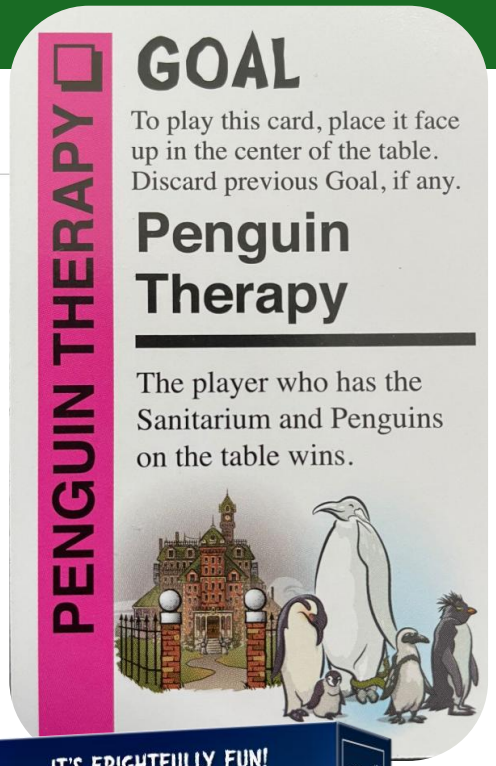
Bicep Goals and “un-goals”

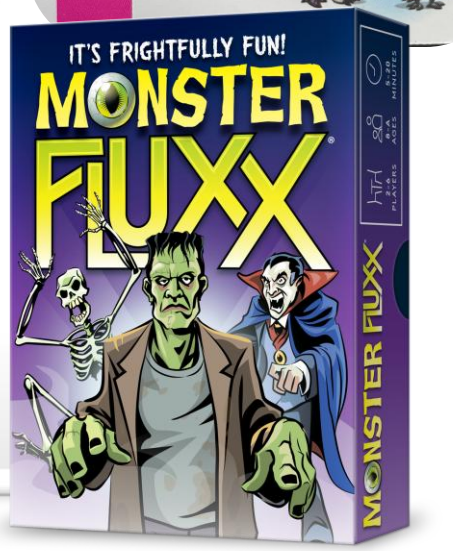
Goals

- Reduce current pain
- Ease of adoption
- Compatible with exiting templates
- Transparent Abstraction: Leverage all the benefits
- Modular: Abstract common blocks of config into r

Non-Goals

- One language to rule them all
- General purpose language to meet any need
- Invent new technology





Bicep language innovations demo

- Bicep snapshot for snapshot validation
- Resource Derived types
- User-defined types and functions
- Fail() Function
- Hidden title tag
- Deployer() function /w userPrincipalName
- Optional Module Names
- @secure() decorator on module outputs
- User-Defined Constraints
- @onlyIfNotExists() decorator
- @RetryOn() decorator

Slide decks and video recordings of my speaking engagements

This repository contains a subset of the slide decks I used while presenting (and co-presenting with community friends) at various in-person around the world online conferences, user groups and webinars. Topics discussed in these sessions are Azure Virtual Desktop (AVD), Remote Desktop Services (RDS), Bicep and ARM Templates and much more! Feel free to reach out if you have questions in regards to these topics. Happy to connect!
