Organizations are surrounded by choice

A person in a blue jacket stands at the center of a fork in a road. The road splits into two main paths, each of which further branches into multiple smaller paths. Above the person, a tall pole holds several large, dark blue arrows pointing in various directions, some straight ahead and others at sharp angles. The background features rolling hills, a winding river, and a few birds flying in the sky. The overall scene conveys a sense of being at a crossroads or a point of significant choice.

All-in-one VDI solution that enables access to applications, desktops, and data from any device

Parallels Remote Application Server (RAS)

Parallels Inc.

Parallels® Remote Application Server (RAS) is an all-in-one remote working solution that enables access to virtual applications and desktops on any device, anytime, anywhere.

Try a fully functional Parallels RAS deployment in Microsoft Azure for 30 days. Deploy and configure Parallels RAS in less than 30 minutes by leveraging prebuilt Azure VM templates, auto-configuration wizards, and PowerShell API.

Parallels RAS deployed on Azure Cloud Service provides a secure, fast, and reliable access to Windows applications and server-based desktops on iOS, iPadOS, Android, HTML5 browsers, and more. Parallels RAS is cost-effective and easy-to-use, making digital transformation a tangible reality for organizations of any size.

Azure Virtual Desktop Extend Azure Virtual Desktop capabilities by integrating, configuring, and unifying all virtual workloads and resources from a centralized console, delivering a single solution to end-users.

Hybrid Cloud - Parallels RAS enables distributed desktop and published application workloads across on-premises and Azure data centers. Leverage Azure Site-to-Site VPN and Traffic Manager to quickly integrate your Parallels RAS deployments.

2024 Magic Quadrant for Desktop as a Service

New Research Alert

I'm very pleased to announce that the 2nd Magic Quadrant for Desktop as a Service has been published.

Gartner clients can access the research here <https://lnkd.in/eGM6mKB8> (G00802050). Clients can also discuss this research with the authors on our client inquiry service.

The MQ has seen vendor movement since last year's research. It is a must read for end user services and digital workplace leaders that in ...more
